Current Projects

Etude

Etude is a service that helps musicians and composers to be more productive by establishing an intuitive workflow including features such as a reference database, a tasks organizer and lyrics and music writing tools.

- Electron-based app written in React/Redux and TypeScript for Windows and macOS;
- I have created a design system and a React Components Library to scale the front-end components into future Etude web and mobile apps.

Zurvivors Mobile

Zurvivors Mobile is the mobile game adaptation of the Zurvivors board game, I am developing a cloud-based Web API to manage the in-game store and transactions and persist user data between devices.

- ASP.NET Core Web API written in C#, using Entity Framework and Azure SQL Databases.

Past Projects

STJ Extractor

STJ Extractor is a tool that extracts and analyzes public data from the Superior Court of Justice in Brazil.

- UWP app written in C# for Windows 10 computers;
- Data analysis using Azure Cognitive Services such as Text Analytics and Language Understanding Service;
- Visualization of extracted and analyzed data in Power BI reports and dashboards.

Microsoft Marketing Calendar

Marketing Calendar is a web app developed to make all countries in Latin America collaborate in ongoing marketing activities taking place around the continent, as well as past ones.

- Web app written in ASP.NET Core MVC with C# and React with TypeScript and several integrations with Microsoft's Active Directory.
